

About Us

Established in 1982, Hales Sawmills is a family business now in its third generation. Based in Market Drayton, we manufacture and supply an ever-growing range of **general sawn wood, agricultural timbers, fencing, decking, gates, garden timbers** and **acoustic barriers**.

In addition, we have an on site **retail store**, selling a wide variety of products including clothing, footwear, home accessories, pet products, hardware, tools, painting and decorating supplies and gardening products.

Setting Standards

As a business we operate by a rigorous set of standards covering workmanship, customer service, health and safety and environmental practices. To ensure our timber products have a long and low maintenance service life and are fully protected against wood decay and insect attack, we pre-treat our softwood timbers using the latest timber technology within our own on-site timber treatment facility. We also have an on site kilning facility to help us carefully dry our timbers where required.

Fencing

Standard Fence Panels

At Hales, we offer a wide range of **Closeboard**, **Overlap** and **Paling** panels which are all manufactured on site. These fencing products offer a high quality, long lasting and aesthetically pleasing solution to enclose and enhance any outdoor space.

All our fencing panels are pressure treated with Tanalith™ wood preservative to Use Class 4. Timber treated with Tanalith™ has an initial natural green colouration and upon external exposure, the green colour slowly weathers to a warm, honey brown and in the longer-term becomes a natural silver grey. This weathering process does not indicate any loss of preservative protection. In some applications, such as fencing, an initial brown colour is preferred. To cater for this we offer Tanalith™ pressure treated with Tanatone™ - a built-in rich brown colour.

Closeboard Panels

Available in 3 styles - flat top, convex top and concave top.

Width	Height
6'	6'
6'	5'
6'	4'
6"	3'
6"	2'

(Bespoke sizes available on request.)

Overlap Panels

Available as flat top.

Width	Height

Fencing

Decorative Fence Panels

We can supply a wide variety of **decorative fence panels** to suit all tastes and budgets. These panels not only add a stylish flair to your garden but also provide long lasting security and privacy. All decorative panels are manufactured from selected softwoods and are pressure treated to Use Class 3 or 4 for added durability (except Willow products/panels).

The most popular sizes are shown below. For our full stock list of styles and sizes, please see our KDM price list.

Gates

Garden Gates and Field Gates

We are proud to be renowned for the quality and range of our timber gates and doors. **Field, Ranch** and **Wicket** gates provide 'open' design options, whilst our **Tongue & Groove** gates and **Closeboard** doors provide additional privacy. All our timber gates and doors are hand manufactured by our in-house skilled team and are pressure treated as standard, except our Tongue & Groove gates which are treated to order.

As well as our standard range we can also manufacture bespoke designs to meet your specific requirements. We carry a wide range of **gate furniture** and offer a choice of robust pressure treated **timber gate posts**. We are also a trusted stockist of **IAE galvanised field** and **equestrian gates**. Contact us for further details.

Driveway Gates

At Hales, all our **driveway gates** are handcrafted to order here at our site in Shropshire by our skilled workers. Choose from our four available styles; **Norfolk, Essex, Gloucester** and **Suffolk**. All styles are set within a deep wooden frame and are constructed using solid tongue and groove boards. As with all our gates, there is fine attention to detail used through construction including mortise and tenon joinery. Choose from two available materials - Swedish redwood or kilned dried Iroko.

All our driveway gates are manufactured to your exact requirements, opposite is a standard size guideline to help. Please ask for a price list. For further information visit www.halessawmills.co.uk.

Services

Machining

At Hales Sawmills we understand that rough sawn timbers are not suitable for every project. With our range of processing machinery we can offer a dedicated planing and cutting service. Our current lead time for planed timbers is usually 7-10 working days*.

Kilning services

We have the very latest technology kilning facilities to help us carefully dry our timbers where required. We also offer a kilning service for customers' own timbers - contact us for further information.

Delivery service

We know how important it is to have your products delivered on time, and with care. To ensure an end-to-end high level service, we have our own fleet of delivery vehicles, including integral off-load facilities, which we use to make both local and UK mainland deliveries throughout England, Wales and Scotland.

*depending on availability of goods and quantity required.

Treatment for long lasting timbers

Quality Treatment

To help ensure the long term performance of our softwood timbers, we have our own dedicated treatment facility. Our range of exterior timbers are all preservative treated with Tanalith™ wood preservative against the threat of decay and insect attack.

With years of proven performance, Tanalith™ is a water-based preservative with a unique combination of copper and organic biocides. When impregnated into the timber through a high-pressure process, Tanalith™ components bond with the wood structure and cannot easily be removed, helping to significantly extend its service life.

The resulting Tanalised™ treated timbers have an initial pale green colour as standard and upon external exposure, will slowly weather to a warm, honey brown and, in the longer-term to a natural silver grey colour. We also offer treated timbers with an initial rich brown colouration if required.

Quality Preparation

All sawn timbers have a moisture content which needs to be reduced to appropriate levels to allow the most effective preservative treatment. At Hales we either air dry or carefully kiln dry our timbers as required to achieve specific moisture contents for each timber species we are using. For certain species we also surface incise our ground contact timbers. This helps ensure an even greater and more consistent penetration of the wood preservative into both the heartwood and sapwood of the timbers.

Our treatment plant operators are fully trained to NVQ level. This allows us to be one of the few companies to treat and supply timbers for the Department of Transport Highways Agency fencing projects.

Retail Shop

Our retail shop stocks a wide range of hardware, clothing, pet supplies and paint with mixing facilities. Visit us on site or at www.halesawmills.co.uk

Responsible Forestry

We support responsible forestry and are proud to be FSC® Chain of Custody certified, showing that all of our timber comes from well managed sources.

The mark of responsible forestry
