

## Husqvarna 225i with battery and charger

Husqvarna 225i is a battery chainsaw, delivering high cutting capacity with less noise compared to a petrol engine, no fumes, or direct CO2 emissions. Excellent for quick and easy pruning, felling small trees and firewood cutting around your home garden. Lightweight, slimmed, and well-balanced, this battery chainsaw is very easy to start and use, built with premium quality in design, cutting performance, and durability. Equipped with our updated digital user interface, inertia chain brake, and optional with tool-less chain tensioner.

### Battery through body design (Pat.pend.)

Smart battery pack position, placed horizontally through the body of the machine. Reduces the risk of having dirt, chips, dust and water accumulate in the battery compartment, causing connector issues. Also, it means the weight of the battery can be placed in or near the desired center of gravity and in the rotational axis of the product, resulting in increased maneuverability. The through body design also offers a high degree of flexibility since it allows battery packs of different sizes to be used.

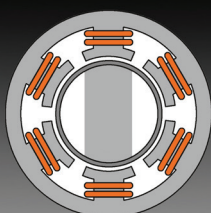

### Inertia chain brake

Effective inertia-activated chain brake.

### Efficient Brushless Motor

High torque-to-weight ratio for increased efficiency, reliability and longer lifetime

### Interchangeable Battery System

Able to be used in all Husqvarna battery tools, our lithium-ion batteries are durable, easy to swap and recharge quickly
