

## Husqvarna 240i with battery and charger

Easy to start and use, this reliable battery chainsaw is built on the proven expertise of Husqvarna premium products. Cut firewood or fell trees effortlessly without the risk of getting stuck in wood. Optimised for heavy-duty cutting, its max torque motor and well-balanced saw body enable a superior user experience for the not-so-experienced user. Part of the Husqvarna BLi-X 36V battery system and with smart solutions for storage, maintenance and safety, this battery chainsaw exceeds expectations.

### Battery through body design (Pat.pend.)

Smart battery pack position, placed horizontally through the body of the machine. Reduces the risk of having dirt, chips, dust and water accumulate in the battery compartment, causing connector issues. Also, it means the weight of the battery can be placed in or near the desired center of gravity and in the rotational axis of the product, resulting in increased maneuverability. The through body design also offers a high degree of flexibility since it allows battery packs of different sizes to be used.

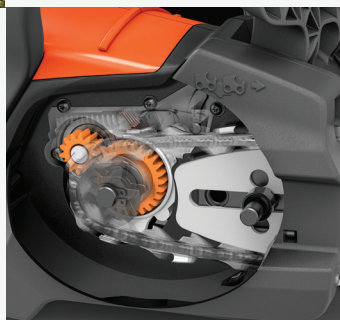

### Interchangeable Battery System

Able to be used in all Husqvarna battery tools, our lithium-ion batteries are durable, easy to swap and recharge quickly

### Max Torque Technology

The Max Torque Technology battery engine delivers a powerful chainsaw that is easy to handle and use with a premium cutting experience optimised for outdoor tasks like firewood cutting.

### Automatic shutdown

The product is automatically shut down when left unattended which prolongs the life of the battery, and also lower the risk for injuries when left unattended.
